DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 5/27/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 8/30/2021 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Election/Restrictions

Newly submitted claim 10 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The new claim is drawn to a process for making a device and not a film as the previous claims were.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 10 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The rejection of cancelled claim 2 (now moot) and claim 3 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, is withdrawn in view of the applicants amendment.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of cancelled claims 1-3 under 35 U.S.C. 103(a) as being unpatentable over Paine, Jr. et al. (5,188,757), is withdrawn in view of the applicants amendment.

Claims 1 and 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over R. T. Paine, "Recent Developments in Borazine-Based Polymers" *Am. Chem Society* (1994) Cpt. 27, page 358-374.

The reference discloses all of the instant compounds in formulas 1-11 (p. 359-370). These boron nitride polymers may be processed into xerogels or aerogels to form coatings (page 367, paragraph 1).

The reference fails to teach that the material is disclosed in between a semi-conductor layers.

The reference does teach that a coating may be formed from the instant polymers, therefore there would be a reasonable expectation of success to modify the prior art to arrive at the instantly claimed invention because the prior art suggest forming the film and the applicant claims the film and not it's use. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to create the instantly claimed films from the prior art of reference.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both the Fazen and Narula reference cited in the IDS read on the instant invention. Additionally, although the IDS has been considered, no translations were provided for references AAA and AAB.
